How Adaptation Explains Everything: From Seashells to Civilization

How Adaptation Explains Everything: From Seashells to Civilization is a book by the evolutionary biologist Richard Dawkins. In this book, Dawkins argues that adaptation is the key to understanding the most complex features of the natural world and the key to human success.

Dawkins begins by explaining the basic principles of evolution by natural selection. He then shows how these principles can explain a wide range of phenomena, from the formation of seashells to the development of human civilization.
