In this extraordinary novel, we meet 12-year-old Billy, a bright and curious boy who lives in a world on the brink of a technological revolution. Robots are becoming increasingly common, performing tasks humans once thought impossible. But Billy's life takes an unexpected turn when his mother is involved in a tragic accident.

As Billy comes to terms with the loss of his beloved mother, he is astonished to discover that his father has created a robotic replica of her. The robot, named M.O.M. (Mechanized Omnipurpose Mother), is designed to provide Billy with all the love, care, and support a human mother could offer.

### **A Unique Bond Forged Between Boy and Robot**

At first, Billy is hesitant to accept M.O.M. as his mother. He worries that she is a mere machine, incapable of providing the genuine affection and connection he craves. However, as they spend more time together, Billy realizes that M.O.M. possesses a unique charm and intelligence that sets her apart from other robots.

The bond between Billy and M.O.M. grows stronger with each passing day. Through their shared experiences and adventures, they learn to overcome prejudice and discrimination from those who cannot comprehend their unconventional family.
